

MARINE INSTITUTE

**Collège communautaire
du Nouveau-Brunswick**

ARTICULATION AGREEMENT

between

**The Marine Institute of
Memorial University of Newfoundland**

and

**Le Collège communautaire du
Nouveau-Brunswick (CCNB)**

in relation to the

Bachelor of Technology Program

May 2008

Preamble

The Manne Institute of Memorial University of Newfoundland, hereinafter referred to as the Marine Institute, and le Collège communautaire du Nouveau-Brunswick (CCNB), hereinafter referred to as the Collège, recognize that there is mutual benefit in collaborating to provide lifelong learning and progressive certification opportunities for Collège students by facilitating access to the University's Bachelor of Technology program.

Objective

The objective of this Agreement is to establish the articulation of the Collège's nationally accredited diploma of technology programs with Memorial University's Bachelor of Technology Program and so to provide access to the degree program to Collège graduates who meet the appropriate National Standard admission requirements.

Context

Memorial University offers a Bachelor of Technology degree Program, administered by the Marine Institute, with admission restricted to graduates of nationally accredited applied science/engineering technology and health science technology diploma programs. Conceptually, the Bachelor of Technology program is a full length undergraduate degree program consisting of a technical component and a component intended to provide a broad societal context for the technology, as well as business related skills and knowledge. The University recognizes that the requirements of the technical component are satisfied by college technology diploma programs that meet defined National Standards. Assurance that programs meet these standards is provided through a national accreditation process administered, in the case of science/engineering technology programs, by the Canadian Technology Accreditation Board (CTAB), and in the case of the health science technologies, by the Canadian Medical Association and the Conjoint Committees for Accreditation. Graduates of such programs may satisfy the requirements for the Degree by successfully completing twelve courses (36 credit hours) offered by a number of the University's faculties and schools, together with a technical project and report.

The degree program is available through distance delivery, with all of the required courses, together with a number of elective choices, delivered using internet-based technology.

The Collège offers a number of technology programs, nationally accredited at the technologist level by the Canadian Technology Accreditation Board (CTAB).

General Agreement

Students graduating from Collège programs accredited by CTAB at the technologist level are eligible for admission to the Bachelor of Technology Program.

The Collège recognizes that it has the responsibility to operate and maintain the programs so that they remain consistent with the National Standards and the requirements for national accreditation.

The Marine Institute and the Collège will co-operate in the promotion of the Bachelor of Technology Program. The Collège will promote the Bachelor of Technology to eligible students. It will liaise with both its graduating classes and its qualified alumni to ensure awareness of the degree program.

The Collège may **describe** this Agreement in its promotional **literature**, and may **recruit** students into its eligible technology programs on the basis of having an articulation with the Memorial University Bachelor of Technology **program**. The Marine institute will reference this Agreement in its Bachelor of Technology Web Page and will **provide** an electronic link to the Collège **Website**.

The Marine Institute will **provide** the Collège with promotional materials for the **Program** together with **camera-ready** source **materials** for **such** local duplication as the Collège deems appropriate. The institute will **participate** in discussions with the Collège related to local promotional activities.

The Marine Institute will **co-operate** with the Collège to facilitate student **application** to the University, acceptance into the **Program**, course registration, completion of graduation requirements and application to graduate.

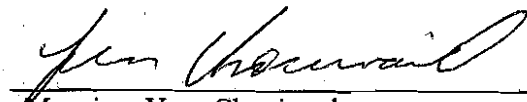

Duration and Termination

This Agreement **shall** become effective on the date of **signing** and **shall be valid** for a period of **five** years, but may be modified, renewed or extended by **mutual** consent.

IN WITNESS WHEREOF, the parties have **signed** this Agreement.

Manne **Institute** of Memorial University of Newfoundland

Collège communautaire du **Nouveau-Brunswick**
