Guide to Block
Transfer Agreements

Guide sur les ententes
de transfert en bloc

Available to graduates from / Pour les diplômés de

College of Craft
and Design

The information contained in this guide results from the cooperation of numerous individuals in the public college systems in Atlantic Canada. The Atlantic Provinces Community College Consortium extends its sincere appreciation to all for their contribution.

Le présent guide a été réalisé grâce à la collaboration de plusieurs personnes œuvrant au sein des collèges communautaires du Canada Atlantique. Le Consortium des collèges communautaires des provinces de l'Atlantique désire les remercier sincèrement pour leur contribution.

Introduction

The Atlantic Provinces Community College Consortium (APCCC) is an interprovincial mechanism with a mandate to collaborate, coordinate and share resources to enhance college level post-secondary education in the Atlantic Provinces. This consortium reports annually to the Council of Atlantic Premiers, through the Council of Atlantic Ministers of Education and Training. It is officially recognized through a Memorandum of Understanding signed by the provincial ministers responsible for community colleges and the presidents of the community colleges in New Brunswick, Newfoundland and Labrador, Nova Scotia and Prince Edward Island.

One of the cornerstones of the consortium is to provide maximum mobility for students through the portability of learning and credits throughout the post-secondary education system in Atlantic Canada. To advance this agenda, the Atlantic Community Colleges entered into a Memorandum of Understanding on Transfer of Credits in 2000. This Guide to Block Transfer Agreements builds on that Memorandum.

This Guide is designed as a tool to be used in conjunction with other post-secondary education and training guidance resources that are available at each of the specific colleges making up the Consortium. The document lists programs available at Colleges and corresponding institutions that agree to recognize those programs for block transfer towards a new educational credential. Registrars, guidance counselors, high school teachers, college faculty, and most importantly students and graduates of secondary and post-secondary institutions will find the Guide to be a good reference source to inform and assist in matters relating to the transfer of credit from Atlantic Community Colleges to other institutions of higher learning. However, it is important to consult directly with the institutions to ensure current status of agreements as they are reviewed and updated on a regular basis.

In addition to the block transfers identified in this guide, it is important to note that a significant number of individual course transfer arrangements are available to students and graduates of the public college system in Atlantic Canada. Details are available by contacting the specific college in which you were enrolled.

Introduction

Le Consortium des collèges communautaires des Provinces de l'Atlantique (CCCPA) est une agence intergouvernementale qui a le mandat de collaborer, coordonner et partager les ressources nécessaires à l'amélioration de l'éducation collégiale dans les provinces de l'Atlantique. Le consortium répond annuellement au Conseil des premiers ministres de l'Atlantique, par l'intermédiaire du Conseil atlantique des ministres de l'Éducation et de la Formation. Le consortium est reconnu par un protocole d'entente signé par les ministres provinciaux responsables des collèges communautaires et par les présidents de collèges du Nouveau-Brunswick, de Terre-Neuve-et-Labrador, de la Nouvelle-Écosse et de l'Île-du-Prince-Édouard.

Une des pierres angulaires du consortium consiste à fournir beaucoup de souplesse aux étudiants grâce au transfert d'acquis et des crédits dans le système collégial du Canada Atlantique. Afin de présenter leurs programmes, les collèges du Canada Atlantique ont signé en 2000 un protocole d'entente sur le transfert des acquis. Le présent guide portant sur le transfert en bloc s'ajoute au protocole.

Le présent guide est élaboré en tant qu'outil et il sera utilisé avec d'autres ressources pédagogiques postsecondaires disponibles dans chaque collège qui fait partie du consortium. Le document énumère les programmes collégiaux ainsi que les établissements qui acceptent de reconnaître les programmes et qui acceptent les transferts en bloc pour l'obtention d'un nouveau diplôme. Les registraires, les conseillers en orientation, les enseignants du secondaire, les professeurs des collèges et plus particulièrement les étudiants et diplômés d'établissements secondaires et postsecondaires pourront utiliser cet excellent guide comme référence pour trouver l'information relative au transfert de crédits des collèges communautaires de l'Atlantique vers d'autres établissements d'enseignement supérieur. Toutefois, il demeure important de consulter les établissements directement pour s'assurer de l'état de l'entente étant donné que cette dernière est régulièrement révisée et mise à jour.

En plus des transferts en bloc énumérés dans le présent guide, il est important de souligner que plusieurs autres cours peuvent être transférés pour les étudiants et diplômés du système collégial public du Canada Atlantique. Pour plus de renseignements, les intéressés sont priés de communiquer avec le collège où ils ont étudié.

Memorandum of Understanding

College Transfer Credit between The Atlantic Community Colleges

WHEREAS New Brunswick Community College, College of the North Atlantic, Nova Scotia Community College, and Holland College, herein referred to as the Atlantic Community Colleges, believe that transfer credit among the region's publicly funded community colleges supports the public policy objectives that students should not have to repeat a formal learning experience and that lifelong learning should be as seamless as possible.

AND WHEREAS the Atlantic Community Colleges believe that students should be provided with the opportunity to complete and/or further their college education and training in the Atlantic region and have agreed to and signed the Association of Canadian Community College's (ACCC) Pan Canadian Protocol for the Transferability of Learning (Appendix I).

THEREFORE New Brunswick Community College, College of the North Atlantic, Nova Scotia Community College, and Holland College announce their commitment to the operating principles governing transfer credit as listed in the ACCC Protocol, and agree on the following additional guidelines governing the development of transfer credit arrangements between their institutions.

Protocole d'entente

Transfert des acquis scolaires entre les Collèges communautaires de l'Atlantique

ATTENDU QUE le Collège communautaire du Nouveau-Brunswick, le College of the North Atlantic, le Nova Scotia Community College et le Holland College, ci-après désignés sous le nom de Collèges communautaires de l'Atlantique, estiment que le transfert des acquis scolaires entre les collèges communautaires de la région qui sont financés par l'État appuie les objectifs de la politique générale selon laquelle les étudiants ne devraient pas avoir à refaire un apprentissage formel et le processus d'apprentissage continu devrait être aussi suivi que possible;

ATTENDU QUE Les Collèges communautaires de l'Atlantique estiment que les étudiants devraient avoir la possibilité de terminer leur éducation et leur formation collégiales ou de les poursuivre dans la région de l'Atlantique et qu'ils ont accepté les termes du Protocole pancanadien de l'Association des collèges communautaires du Canada pour le transfert des acquis scolaires (annexe I);

PAR CONSÉQUENT, le Collège communautaire du Nouveau-Brunswick, le College of the North Atlantic, le Nova Scotia Community College et le Holland College déclarent leur engagement envers les principes de gestion qui guident le transfert des acquis scolaires tels que décrits dans le protocole de l'ACCC et acceptent les autres lignes directrices mentionnées ci-après qui guident l'élaboration des ententes relatives au transfert des acquis scolaires entre leurs établissements.

Guidelines for the Development and Operation of Transfer Arrangements

1. Each College has identified the Registrar's Office as responsible for the distribution of information on transfer policies and practices.
2. Provincial High School Diplomas, Community College Adult High School Diplomas, and GED Certificates of High School Equivalency will be recognized as meeting the minimum requirements of a high school diploma, regardless of the province of origin.
3. Programs that have attained an external accreditation for a specific occupational designation should be assumed to be equal in terms of program outcomes.
4. Diploma prerequisites for post diploma programs should be viewed with the understanding that similar diploma programs in each of the region's colleges, while not exactly the same, do provide an equivalent body of knowledge and skill that should meet the admission requirements.
5. Programs with both certificate and diploma exits (1+1 programs) should recognize that similar certificate programs in the region's colleges, while not exactly the same, do provide an equivalent body of knowledge and skill that should be viewed as meeting admission requirements.
6. Applicants granted block transfer¹ of post-secondary credit toward a program of study are deemed to have met the minimum admission requirements for the program, however the awarding of transfer credit does not guarantee admission.
7. Students will be given every opportunity, through each institution's process of Prior Learning Assessment, to receive recognition for past learning acquired informally through an individual's work and life experiences.
8. Each institution agrees, when awarding transfer credit, to recognize each other's standard of grade required for successful course or program completion.
9. College promotion of transfer credit and articulation should ensure that information is readily available and accurately describes arrangements.

¹ Block transfer typically refers to the transfer of a semester, a year, a certificate, or a diploma.

Lignes directrices pour l'élaboration et l'application des ententes relatives au transfert des acquis scolaires

1. Chaque collège a désigné le bureau du registraire comme responsable de la distribution de l'information sur les politiques et les pratiques relatives au transfert.
2. Il est reconnu que les diplômes d'études secondaires provinciaux, les diplômes d'études secondaires pour adultes émis par les collèges communautaires ainsi que les diplômes d'équivalence d'études secondaires (GED) répondent aux exigences minimales d'un diplôme d'études secondaires, peu importe la province d'origine.
3. Les programmes qui ont obtenu une accréditation externe pour la désignation d'un métier particulier doivent être considérés comme égaux en ce qui concerne les attestations relatives aux programmes.
4. Les diplômes préalables aux programmes d'études supérieures doivent être considérés en gardant à l'esprit que les programmes semblables menant à un diplôme dans les collèges de chaque région constituent effectivement un ensemble équivalent de connaissances et de compétences qui doit répondre aux conditions d'admission même si les programmes ne sont pas tout à fait les mêmes.
5. Les programmes qui mènent soit au certificat soit au diplôme (programmes 1 + 1) doivent reconnaître que les programmes semblables menant à un certificat dans les collèges de chaque région constituent effectivement un ensemble équivalent de connaissances et de compétences qui doit répondre aux conditions d'admission même si les programmes ne sont pas tout à fait les mêmes.
6. On juge que les candidats pour lesquels on accepte le transfert en bloc¹ d'acquis scolaires de niveau postsecondaire obtenus dans le cadre d'un programme d'études répondent aux conditions minimales d'admission au programme. Le transfert d'acquis scolaires ne garantit toutefois pas l'admission.
7. Grâce au processus d'évaluation et de reconnaissance des acquis de chaque établissement, les étudiants bénéficieront de nombreuses possibilités de faire reconnaître leur apprentissage acquis de façon informelle en milieu de travail et par l'expérience de la vie.
8. Chaque établissement accepte, lorsqu'il accorde un transfert d'acquis scolaires, de reconnaître la norme des autres établissements relativement à la note minimale à obtenir pour terminer avec succès un cours ou un programme.
9. La promotion du transfert d'acquis scolaires et de l'articulation des programmes dans les collèges permettra de fournir des renseignements rapidement et de définir correctement les dispositions nécessaires.

¹ *Le transfert d'un bloc signifie généralement le transfert d'une session, d'une année, d'un certificat ou d'un diplôme.*

APPENDIX I

Association of Canadian Community College's Pan Canadian Protocol for the Transferability of Learning

April 1999

THE PROTOCOL

The signatory to this protocol agrees to maximize the recognition and transfer of learning acquired through formal education, workplace training and work and life experience.

The signatory further agrees to the following Operating Principles:

1. Transfer credit will be awarded in accordance with the policies and regulations of the governing bodies of the institutions concerned. It is the prerogative of each institution to set admission requirements and prerequisites, to determine program design and delivery, to establish all requirements for credentials, and to limit admission to programs based on availability of resources. Transfer credit shall be awarded to students for credits earned that are related to the program of study in which the transfer student will register.
2. Course or program transfer credit shall be based on an equivalency of educational achievement and of knowledge, skills, abilities, and outcomes recognizing that effective learning can occur under a variety of arrangements and conditions. This includes all forms of formal and informal learning such as self-study, work place education, training and experience. Various methods of demonstrating or achieving equivalency may be employed such as program reviews of work place training, competency tests, challenge examinations, and other forms of prior learning assessment.
3. Transfer credit not deemed to satisfy specific program requirements should be awarded whenever possible to fulfill other general requirements.
4. An institution that denies the transfer of credit shall state the reasons for the refusal.
5. If formal transfer arrangements are to be effective, current information must be readily available that accurately describes course equivalencies, program prerequisites, and levels of achievement on which admission to awarding of transfer credit at receiving institutions will be based. Receiving institutions should not make changes in these arrangements without providing adequate notice and lead-time to other institutions. Each institution should identify an office that is responsible for distribution of information on

ANNEXE I

Protocole pancanadien de l'Association des collèges communautaires du Canada pour le transfert des acquis scolaires

Avril 1999

LE PROTOCOLE

Le signataire du présent protocole accepte de maximiser la reconnaissance et le transfert des acquis obtenus par l'entremise d'études officielles, d'une formation en milieu de travail ainsi que d'expériences de travail et de vie.

Le signataire accepte en outre les principes directeurs suivants :

1. Un transfert d'unités sera accordé conformément aux politiques et aux règlements des entités administratives des établissements d'enseignement concernés. Il incombe à chaque établissement de fixer les critères et les conditions d'admissibilité, de déterminer les modalités pour la conception et la prestation des programmes, d'établir toutes les exigences en ce qui concerne les titres et de limiter l'admission aux programmes en fonction de la disponibilité des ressources. Un transfert d'unités sera accordé aux étudiants pour des unités obtenues en association avec le programme d'études dans lequel l'étudiant souhaite s'inscrire.
2. Reconnaissant qu'un apprentissage efficace est possible dans différents cadres et diverses conditions, le transfert d'unités pour des cours ou des programmes d'études sera fondé sur l'équivalence du niveau de scolarité ainsi que sur les connaissances, les compétences, les aptitudes et les résultats. Cela comprend toutes les formes d'apprentissage, officielles et non officielles, comme les études individuelles, la formation en milieu de travail, les stages de formation et l'expérience. Les établissements peuvent employer diverses méthodes pour démontrer ou accorder des équivalences, comme l'examen de la formation en milieu de travail, des tests de compétences, des examens d'équivalence et d'autres formes d'évaluation des acquis.
3. Le transfert d'unités qui ne satisfait pas aux exigences précises d'un programme devrait, dans la mesure du possible, être accordé pour combler d'autres exigences générales.
4. Un établissement qui refuse un transfert d'unités devra préciser les raisons de son refus.
5. Pour que les dispositions officielles relatives au transfert d'unités soient efficaces, il faut avoir facilement accès à des renseignements à jour décrivant précisément les équivalences de cours, les conditions préalables des programmes et les niveaux de scolarité requis pour accorder le transfert d'unités aux établissements d'accueil. Les établissements d'accueil ne devraient pas modifier ces dispositions sans aviser suffisamment à l'avance les autres établissements. Chaque établissement devrait déterminer un bureau qui serait chargé de diffuser l'information au sujet des politiques et des pratiques relatives aux transferts.

2016 Block Transfer Agreements

Notes to Guide:

1. College Legend:

CNA - College of the North Atlantic
CCNB - Collège communautaire du Nouveau-Brunswick
